| Severity:	Minor				Status:	OPEN

TITLE:
The fields name, surname and address are not validated.

DESCRIPTION:
When I fill the data in the fields Name, Surname and address, with special characters the page allows me to perform this action.

REQUERIMENTS:
- A valid Customer credentials to login in Internal Portal.
- A installed the latest version browsers (E.g. FireFox Mozilla, Google Chrome, Safari, Opera).
- A access to Internal portal
- A new account created

STEPS:
1. Go to order page http://stable.internal.qadal0501.softlayer.local/Customer/addUser/1897056
2. Fill de fields Name with especial characters special 2$% and numeric.
3. Fill the fields Last name with the characters special &2 .
4. Fill the fields Address with the following character 12^%#&42.
5. I press add user profile.

ACTUAL RESULTS:
The page allows the filling of the fields Name and Surname with special characters and allows the registration of the data.

EXPECTED RESULTS:
I was hoping that the page would not allow me to fill in special characters in this fields, also that it would not allow me to register.

TITLE:
The email field has no validation if the email exists or is an invented email.

DESCRIPTION:
When you fill in the data in the email field the program does not validate the entered emails if it exists.

REQUERIMENTS:
- A valid Customer credentials to login in Internal Portal.
- A installed the latest version browsers (E.g. FireFox Mozilla, Google Chrome, Safari, Opera).
- A access to Internal portal
- I press add user profile.

STEPS:
1. Go to order page http://stable.internal.qadal0501.softlayer.local/Customer/addUser/1897056
2. Fill de fields with follow text "prueba@12315.com".
3. I press fields user.

ACTUAL RESULTS:
The page allows you to fill in the field Field email without verifying if there is email and allows you to make the registration.

EXPECTED RESULTS:
I was hoping that the page would not allow me to fill an invalid email and at the time of user registration would not allow me to perform this action.

TITLE:
Error in the display of Order to Control fields are linked.

DESCRIPTION:
When viewing user accounts in the Order and Control these links are linked. This happens when the UserName field has a considerable length which forces Order and Control to be linked.

REQUERIMENTS:
- A valid Customer credentials to login in Internal Portal.
- A installed the latest version browsers (E.g., Google Chrome).
- A access to Internal portal
- I press add user profile.

STEPS:
1. Go to page http://r924460.internal.qadal0501.softlayer.local/Customer/viewCustomer/1897056
2. Select link Order or Control.
3. Select with the point mouse.

ACTUAL RESULTS:
The page shows the user accounts, in the field where this Order and Control shows together.

EXPECTED RESULTS:
I was hoping the page that the Order and Control links would be separated.
